EDUCATION

Georgia State University

B.S. in Computer Science | B.B.A. in Management

B.B.A. Concentration: Supply Chain and Operations Management

Current Coursework: System-Level Programming, Software Development, Artificial Intelligence, Machine Learning

Certifications & Training: Professional Scrum Master I, Scrum.org | AI Infrastructure & Operations Fundamentals, NVIDIA | Machine Learning with Python, IBM

Atlanta, GA

Expected May 2028

GPA: 3.73

WORK EXPERIENCE

Lockheed Martin - Sikorsky

Supply Chain Operations Intern

Stratford, CT

May 2026 – Aug. 2026

- Automated recurring supply chain reporting and built SBM/Excel clause-comparison trackers for T&C and Finance reviews, clearing 7 stalled Finance approvals within two weeks.
- Analyzed SAP sourcing data to identify single-source and no-bid supplier risk, prioritizing higher-risk S-92 suppliers for escalation.
- Drove sourcing and contracting workflows across 130+ suppliers supporting the S-92 and MH-60R programs, including RFQs, LTAs, SAP/PMC, and T&C reviews.

Metcam

Supply Chain & Automation Intern

Alpharetta, GA

Jun. 2025 – Sep. 2025

- Programmed the first automated tooling profiles and bend sequences for HVAC units with up to 50 complex bends, replacing manual single-bend resets and alignment.
- Created reusable tooling templates and operator documentation for two HVAC bending programs, enabling operators to run and modify workflows independently.

Cantaloupe Inc.

Data Analyst Intern

Atlanta, GA

Feb. 2024 – Oct. 2024

- Built Tableau dashboards for weekly sales reporting, demand forecasting, and supplier planning, cutting report time from 4 hours to 30 minutes.
- Mapped legacy Salesforce fields to NetSuite ERP objects and validated migrated records, ensuring accurate KPI reporting across sales, purchase orders, and supplier activity.

Metcam

CAD Engineering Intern

Alpharetta, GA

Aug. 2023 – Dec. 2023

- Designed and prototyped 10+ HVAC assemblies and secure vending kiosk enclosures in SolidWorks from customer requirements, implementing a keyed locking mechanism and simplifying designs for low-cost manufacturing.
- Reverse-engineered existing products and developed BOMs around existing inventory, reducing new-part costs, fabrication steps, and labor complexity.

PROJECTS & PROFESSIONAL DEVELOPMENT

NASA L'SPACE Mission Concept Academy (MCA) | Program Analyst

Fall 2026

- Developing and maintaining mission risk, requirements, cost, and schedule documentation for a 12-person NASA mission concept team, leading project planning and Preliminary Design Review (PDR).

UNSPSC Commodity Code Validation Tool | Technical Lead

Summer 2026

- Led development of a browser-based procurement data-quality tool at Lockheed Martin that validates Excel files with up to 240,000 rows against a 5,500-code UNSPSC reference database.
- Developed a TF-IDF scoring engine using synonym matching, abbreviation expansion, and hierarchy context to flag misclassifications and rank recommended corrections.
- Implemented local-only processing with JavaScript, Alpine.js, SheetJS, and Chart.js, eliminating server dependencies and keeping sensitive procurement data on the user's machine.

LEADERSHIP

FIRST Robotics

Mechanical Director & Vice President

Cumming, GA

Aug. 2021 – May 2024

- Led a 25-student team in designing and manufacturing a 125 lb competition robot using CAD/CNC, coordinating design reviews, fabrication, safety, and build deadlines.

TECHNICAL SKILLS

Programming & Software: Python, Java, JavaScript, MATLAB, Simulink, AI/Machine Learning, Unix/Linux

Data & Analytics: Tableau, Excel, NLP, TF-IDF, data validation, reporting, forecasting

Engineering & Manufacturing: SolidWorks, Master Bend CAM, Amada ATC, CNC machining, reverse engineering, 3D printing, laser cutting

Enterprise & Operations: SAP, NetSuite, Salesforce, SyteLine, RFQs, LTAs, supplier sourcing, procurement analytics, Agile/Scrum, Jira
